The Texel Sheep Society provides enhanced data collection and performance reporting services to its membership and supports the National Terminal Sire Evaluation.

texelplus indexes have been updated, making them simpler to use and understand.

In simple terms: higher value = higher profit per lamb

The texelplus economic indexes support the breed's development with an increased focus on commercial traits and profitability. The **TERMINAL** and **REPLACEMENT INDEXES** reflect the breed's influence on industry. Both are presented as the potential extra profit per lamb born in a commercial setting, compared to the population average.

Index	Average	Top 25%	Top 10%	Top 5%	Top 1%
Terminal Expected change in profit per terminal lamb born	£4.03	£5.13	£6.12	£6.71	£7.81
Replacement Expected change in profit per replacement lamb born	£4.23	£5.37	£6.40	£7.01	£8.17

The **TERMINAL INDEX** supports increased profitability through improving prime lambs and is weighted strongly for meat production. The **REPLACEMENT INDEX** includes additional maternal traits to optimise production of female replacements.

Commercial producers solely producing prime lambs should use the **TERMINAL INDEX** to inform their selection; however, those retaining female replacements should use the **REPLACEMENT INDEX**.

Sub-indexes underpin the indexes to provide more information on the relative values of growth, carcass quality, reproduction, and adult size.

An example

High ranking rams deliver over £6.00 per lamb more than lower-ranking rams. Over a ram's working lifetime, this is easily worth an extra £1,500 per ram; generated through shorter finish times and improved carcass quality.

Understanding **texelplus** indexes in catalogues

TXX1900123(2)

Born: 09/02/2019
Inbreeding coefficient: 6.5

	Growth	Adult Size	Repro.	Carcass	Index	Index Acc.	Ranking
Terminal	£5.44	N/A	£-0.01	£0.88	£6.31	86%	TOP 5%
Replacement	£7.21	£-1.22	£0.84	£1.16	£8.00	85%	TOP 1%

Trait weighting

Different emphases are given to individual traits between the terminal and replacement indexes. This results in different sub-index values.

Reproduction sub-index

The commercial benefit of lambing ease, litter size and maternal ability. Promotes optimum litter sizes and better mothers.

Adult size sub-index

The benefit of mature size as a replacement ewe. Promotes smaller animals as they require less maintenance.

Growth sub-index

Captures the benefit from growth using eight-week weight and scan weight information. Faster growth is more advantageous.

Carcass sub-index

The value of muscle and fat weight in the carcass. Encourages muscle growth with fat cover.

Accuracy

A measure of accuracy of the index. The higher the number the better.

Index values

The sum of the sub-index values and potential profit per lamb born for terminal and replacement production.

Ranking

Where the animal ranks compared to the current average animal.

Further information on **texelplus** services and help on understanding breeding values and indexes is available at <https://texel.uk/texelplus/>

SUFFOLKS

SOLWAYBANK SUFFOLKS

Export Potential

The females from Solwaybank will be at Longtown Mart for viewing and sale. If the sheep are sold for export, the sellers undertake to take them home and A.I. them to a top stock ram. They will then have them ready to ship out to their purchasers in the autumn. The ram lambs will also be available for export, but they will remain on the farm and will not be in the mart so that they can be exported off the farm without undue delay.

SHEARLING GIMMERS
